Trays

Our exclusive B-Lok trays and covers provide an excellent method of infection control and safety that allows for two benefits other trays do not:

1. Prevents any contaminated items from falling off of the used tray during transportation from operator to central sterilization. The contaminated items stay enclosed until you are ready for the cleaning and sterilization process.
2. Set up your procedure trays ahead of time with all instrumentation needed. The Safe-Lok® cover securely locks to the tray, not only keeping items clean, but also allowing for safe transportation to chairside. The cover is removed once the patient is in the chair and the procedure begins.

\$16.50 | MINI TRAY COVER F-SIZE (NON-LOCKING) (20Z102)

Dimensions: 9-5/8" x 6-5/8" x 7/8"

The Safe-Lok® Tray Cover helps in compliance with OSHA and CDC, providing safe transportation back to the central sterilization area.

Are you in compliance?

OSHA | Immediately or as soon as possible after use, contaminated reusable sharp shall be placed in a puncture-resistant, leak-proof and labeled or color-coded containers until properly reprocessed. (To avoid spillage of contents, it is suggested that they be covered and secured prior to moving.)

CDC | Contaminated instruments must be “contained” prior to transporting them. Containment can be defined as instrument cassettes or cages in which dental care items are cleaned, sterilized, and stored until point of use. Sharp instruments should not be carried openly to the instrument-processing area. Percutaneous injuries may occur to other dental healthcare personnel (DHCP) or patients in hallways leading to the instrument-processing area.

Multi-Mod Racks *Adjustable to fit your needs!*

Tub and tray racks are effective additions to a dental practice. These racks have non-slip feet so they are stable on any counter or cabinet surface. With a chrome-plated finish, these racks can fit any dental practice design.

Why Use Zirc's Cassettes?

A low-cost investment with a quick return! Individual instrument handling takes time away from treating patients and increases overall reprocessing time. Zirc's cassettes improve instrument efficiency, safety, and compliance without breaking the bank.

Product Benefits

- Zirc's cassettes will save you time and help prevent injury.
- Keep instrument setups together; no sorting.
- Protects your instruments from damage and prolongs their life.
- Prevents the team from a potential exposure.
- Better patient perception, making patients less anxious.

Mirror Magic® Anti-Fog System

The Mirror Magic® Anti-Fog System prevents fogging on mouth mirrors and offers the practitioner a quick method for removing debris during procedures. The disposable swipe pads stick to the back of a gloved hand for easy access. The Anti-Fog System requires only a small amount of solution that provides 45 minutes of fog-free working time and is economic in size, making it easy to store.

The mirror magic® Anti-Fog System decreases fogging while also decreasing the build-up of debris on my mirror. This affords me outstanding visualization, which is crucial to performing quality dentistry. mirror magic® has truly made a difference in my practice and is one of those features I didn't realize I needed; and now I can't imagine practicing without it.

– Andrew M. Goldsmith, DDS, DICOI, FIALD
